The Electronic Anti-Scale System For Agriculture Applications

No Salt
No Chemicals
No Maintenance

German Technology
Absolutely Magnetism-Free

Vulcan – The alternative to water softeners

Water is a valuable resource which needs to be managed properly to maximize efficient usage. When hard water is used to irrigate crops (corn, soy-beans, etc.) scale deposits form on plants and their leaves which obstruct contact with sunlight. This hinders the process of photosynthesis and therefore the growth of your plants.

Benefits for your agriculture applications with Vulcan

- ▶ Reduction of scale in pipes, sprinklers and filters
- ▶ Promoting healthier and greener turf
- ▶ No need of salt or aggressive chemicals
- ▶ Less time and effort spent on cleaning
- ▶ Fruits and vegetables keep their natural taste
- ▶ Minimizing the need for fertilizers and pesticides

The eco-friendly solution

Often scale acts as a magnifying glass with its crystal structures, which burns the plants. Saltbased ion exchangers have a negative effect on the environment in agricultural applications because of residual nitrates that leach into the ground water. Because of this salty discharge, traditional water softeners are not ecofriendly. With strict regulations and restrictions on enterprises using "Eco-Friendly" or "Organically Grown" labels, Vulcan's chemical-free method is the solution of choice.

Vulcan provides fresh water

With Vulcan, it is easier for plants to absorb the water. Vulcan is not only effective in the case of irrigation, but also in providing fresh water to livestock and poultry. In these applications, the clearing of nozzles and general maintenance of your water-related equipment will be required at much longer intervals. Bacteria will neither have a host environment to thrive in nor will not be able to accumulate and negatively affect plants and livestock.

Vulcan installed at a tree nursery

"... all these years the leaves of the plants had a white color and not the well known green color.

After installing the Vulcan S25, I found out there is no more white sedimentation on the leaves and soil. Most of all I realized a big improvement in the growth of my plants. I also found out that there is better and quicker lathering, when we wash our hands or even clothes etc.

Finally, I must say that I really found the solution to my problem, which has been bothering me for all these years..."

Application examples

- ▶ Irrigation fields and sprinklers
- ▶ Organic food plants
- ▶ Livestock farming
- ▶ Green houses
- ▶ Vineyards
- ▶ Fruit plantations
- ▶ ...

Vulcan Prevents Scale and Rust

- ✓ Reduction of existing scale in the piping system
- ✓ Installation without cutting the pipe
- ✓ From ½" up to 20" pipe diameter
- ✓ Works on all pipe materials – iron, copper, plastic, stainless steel, PVC, compound pipes, PE-X, etc.
- ✓ 100% maintenance-free
- ✓ Eco-friendly solution without salt or chemicals
- ✓ Prolongs life of machinery and equipment
- ✓ Important minerals remain in the water
- ✓ Long life – fully cast in acrylic
- ✓ 10 year international warranty
